

GRIGNASCO *Knits*
Knitting notes

Since 1894 at the Grignasco plant we have been faithful our production style in knitting: the attentive selection of raw materials and integrated quality control of the whole production process at our plant.

From as early as the 1930s, alongside the more traditional yarns for weaving and knitwear, Filatura di Grignasco® proposed the first yarn for hand knitting as part of experimentation and research.

Today, as in the past, GrignascoKnits is the area of the Grignasco1894 Company dedicated to research and development of Italian style in accordance with our strict production and quality parameters.

Today, just as in the past, we stay true to the spirit of the company.

Mod. 001 - Yarn Springfield

Mod. 005 - Yarn Charme

Mod. 003 - Yarn Charme

Mod. 002 - Yarn Merinogold 8

Mod. 006 - Yarn Lodensoft
